Expected Timeframe for the Localization Study Research Team:

The proposal should refer to the estimation of the allocated individual working days of the Research Team included below and include the time for the review of the Localization Study Steering Committee. The estimation of 104 days in the scope of 5 months can be increased or limited, what is expected to be argued in the proposal and based on the bidder expertise on the matter. The cost of the working days by consultants should be reflected in the budget proposal. The deadline for all the deliverables is the end of May 2024. The Research Team has to demonstrate the human capacity to meet the deadline.

	When (estimation)	Allocated days	Derivable
	ongoing	ongoing	Weekly checks, 30 min, with the Localization Study Operator
